	Coarse Nail Drill Bit	B1SC083	This coarse carbide nail drill bit quickly strips off hard gel and acrylic with minimal pressure. Its aggressive cutting surface makes bulk removal fast and efficient for heavy-duty filing.
	Coarse Nail Drill Bit	B1SC084	Engineered for rapid product breakdown, this coarse drill bit tackles thick enhancements in seconds. The sharp, deep flutes ensure smooth dust evacuation and prevent overheating during the removal process.
	Medium Coarse Nail Drill Bit	B1SC085	This medium-grit nail drill bit refines leftover product after coarse filing for a balanced, even surface. It smoothly levels out ridges and transitions, making it ideal for shaping and contouring.
	Medium Coarse Nail Drill Bit	B1SC086	Perfect for blending and smoothing, this medium drill bit preps the nail plate without excessive abrasion. Its moderate cutting action works well for thinning down builder gels and hard polymers.
	Fine Nail Drill Bit	B1SC087	This fine cone-shaped nail drill bit gently cleanses the proximal fold and removes superficial cuticle buildup. Its delicate texture polishes the nail bed while safely sweeping away dead skin layers.
	Fine Nail Drill Bit	B1SC088	Engineered for precision work, this fine-tipped drill bit meticulously refines the sidewalls and eponychium area. It gives a clean, finished look by softly buffing away residual cuticle and dry tissue.
